

St. Patrick of Heatherdowns Pre-School Program

**4-year old, Monday—Friday
8:30—11:30 AM**

The philosophy of our pre-school program is based on research that says children learn best through play, interaction with other children and activities that promote creativity. Our classroom is designed to stimulate learning through hands-on exploration of the learning environment.

The 4-year old program utilizes play based centers, large and small group activities and learning games. Children will learn basic classroom skills, including following adult directions, participation in group time, and appropriate social skills. Lesson plans incorporate the alphabet, letter sounds, number sense, pre-writing and pre-reading skills, and other areas found in state preschool standards.

The most important thing for children to have is a love of school and strong support system at home in order to be successful.

Registration papers must include a copy of the child's birth certificate, social security card and \$75 registration fee.
